

## What kind of place is Kondadai?

Kondadai forest is located in the northeast of the city of Tsukuba, 4 km from Tsukuba station (8 min. by car).

On the east side of the forest plateau, woodland-covered slope stretches in the north-south direction. Below the plateau there are rice paddies and rural settlements.

Inside the forest, places that used to be 'yatsuda' paddy fields in the past, are now marshland. Marshlands on the east and the west side of the forest are both unique, each in a different way.

Kondadai is also rich in historic sites, including nationally designated Konda Kanga Ruins. As such, Kondadai is a place where human activities intersected with nature's workings since ancient times.
